### Artist's Statement

I am looking for the "aliveness" in the still life; the painterly within the linear, the glow within the dark areas, the patterns within the light.

Light and dark, edges and motion. An edge defines an enclosure and at the same time is a starting place for a new shape. I want the eye to be led around a picture and then be slowed and indulged in the quiet places. Motion and stillness, diving into an area and being led out again across the surface.

Color, shape, brush stroke, and line, all help in the palm of a strong composition. This is my aim.
